presents

## Cooperative Learning For the 21<sup>st</sup> Century: Cooperative Learning, Lesson Design and Formative Assessment

**Date:** Thursday, Feb. 9  
**Place:** OISE (252 Bloor West room 5280 (fifth floor)  
(St. George Subway Station)  
**Time:** 7:00 - 9:15 p.m

PowerPoint-and-talk may have replaced chalk-and-talk but many classrooms continue to feature the familiar teacher-centred question and answer approach. Most teachers could increase their effectiveness with a more intentional approach to lesson design that integrates cooperative learning structures with formative assessment strategies. Learn ways to make your classes more energetic and your students more successful in this highly interactive workshop.

Presented by Don Plumb

**Don Plumb** has led teacher training workshops in Canada and overseas for over twenty years. He worked at TVOntario as an Education Officer for broadcast and online professional development and the Virtual Classroom. He taught secondary school Science and Mathematics for many years, is co-author of a number of standard Science textbooks used across Canada, and has a book on cooperative learning, *Structures for Success in Chemistry*, published in the U.S. by Kagan Publishing. His particular current interest is working as a teacher mentor to expand their repertoire of teaching strategies beyond PowerPoint and question-and-answer.
